

21st Century Guidebook to Fungi

Genomic systems analysis of fungi

MycoCosm is a fungal genomics portal (<http://jgi.doe.gov/fungi>), developed by the US Department of Energy Joint Genome Institute to support integration, analysis and dissemination of fungal genome sequences and other ‘omics’ data by providing interactive web-based tools. MycoCosm also promotes and facilitates user community participation through the nomination of new species of fungi for sequencing, and the annotation and analysis of resulting data. View the current list on the following page, and links to publications about the sequences: <https://genome.jgi.doe.gov/fungi/fungi.info.html>.

Grigoriev, I.V., Nikitin, R., Haridas, S., Kuo, A., Ohm, R., Otillar, R., Riley, R., Salamov, A., Zhao, X., Korzeniewski, F., Smirnova, T., Nordberg, H., Dubchak, I. & Shabalov, I. (2014). The following is a list of published papers (additional to those cited in the text) that will ease you into the world of fungal genomics. The list has been put together favouring these criteria: (a) open access publishing; and (b) illustrating different approaches. The list is in alphabetical order of the first author’s name.
